Wild Day on New York Stock Exchange, With Big Gains in Rails and Industrials

GREAT GAINS ARE MADE IN STOCKS. PRODUCE MARKET BULLS IN FULL CHARGE AND RUNNING THINGS

NEW YORK, Nov. 6.—Wall Street bulls could not keep out, and the prom was in splendid humor with itself this ise was for a very strong close. morning. From the other side came astion between Germany and France had passed over without leaving anything more serious than a rumor in its wake while London accepted the changed conditions with great relief and started to buy American shares with much

Big Interests Bullisn.

The big men stood under the market Inter. Metro Inter. Metro pfd..... in excellent manner right from the start and market orders were numerous from all sections of the country. Naturally enough, the sharp adyance that followed the opening brought out some profit-taking, and this feature of the market may be expected from time to time. The end of the one-sided markets is at hand. Speculators and room traders are bullish. They buy stocks and take profits and buy again.

London Bought 30,000 Shares.

London bought in all about 30,000 shares in the first hour. The strength of the market is an incentive to pro-fessionals and people who sold stocks before the election to buy them back. London sold Northern Pacific and Union Pacific before the election—Pecleaned out the stocks there, and many continental holders did the same.

They want them back. quarters' advance, and it did not take it very long to advance to 177%. The reaction was but one-quarter point. Southern Pacific opened at 11½, also three-quarters better, rose to 111½ and reacted to 111½. Northern Pacific three-quarters better at 149½, moved to 149½, eased off to 149½ and raililed one-quarter. Missouri Pacific was one-quarter better. Baltimore and Ohio 2 ained 3. Chesapeake and Ohio 3. New York Central was one of the strong stocks of the day, advancing two points almost immediately and remaining very firm throughout. Wisconsin preferred was 1½ higher at 85.

Big Industrial Ceir.

Big Industrial Gains.

In the industrials Smelter improved U nearly two points to 96%, and was steady within % of high. Locomotive was 1% better. Sugar gained ½. Woolen Goods, ½. Anaconda was 1½ better, and Amalgamated % to 85. The Steels were strong and frac-

tionally firmer.

Everybody expects a reaction, but they do not know just when it will come. They are not willing, however. they do not know just when it will come. They are not willing, however, to permit the market to get away from them on the upward turn, but will follow and try and turn quickly, when the market does. At least that is the program. Time will tell whether or not they can do it.

Another Boom.

After resting for a few minutes in the test hour of the market, and the market have of the morning, the market will be the market does. At least that is the program. Time will tell whether or not they can do it.

Another Boom.

After resting for a few minutes in the test hour of the morning, the market have a few minutes in the test hour of the morning, the market have a few minutes in the test hour of the morning, the market have a few minutes in the test hour of the morning, the market have a few minutes in the test hour of the morning the market are a few minutes in the test hour of the morning the market are a few minutes in the test hour of the morning the market are a few minutes in the test hour of the morning the market are a few minutes in the few market are a few market are a few minutes in the few market are a few ma

last hour of the morning, the market started the afternoon with a hurrah. amid wild trading, sharp gains were made throughout the list under the leadership of Union Pacific, St. Paul, and

TODAY'S PRICES ON

NEW YORK EXCHANGE

Street accepted this as meaning the entorcement of the Roosevelt policies, but in a different way, using different methods, and accepted the belief fully and with the confidence of people who do not anticipate any dangers threatening the country or the prosperity of the nation for the next eight years at least.

Bulls Start to Work.

On the strength of these conditions it was the proper time to whoop stocks. Harriman, Morgan, the various pools, and the general public so considered it, and the market became very active from the tap of the bell, with sharp advances throughout the list. Everything was higher—rails, industrials, and bonds—the feeling being one of contented confidence.

The industrials as a group moved up a point or two under the lead of Smelter and Copper. On all sides industrial reports indicated the turning of the tide, the passing of the 60 per cent producing capacity and the entrance of the 70 to 90 per cent capacity, with an an almost certainty of the speedy return to par, although there are many operations that will await the Inauguration before being pushed to completion.

Big Interests Bullish.

Steel, pfd.....

THE CURB MARKET.

New York Central.

The Hariman clique bossed the market for sure and certain there were great gains throughout the list

New York Central turned to 111%, a gain of over 3½ points for the session, and the top prevailed at 1:30 o'clock this afternoon.

Union Pacific rose to 178½@2½ advance. St. Paul rose to 143% and the whole list moved up by fractions, and the gains were all well sustained.

It was an old-fashioned bull market, with a hurrah, a market when the Open High Low 139 low point.
